- LVT
- Linoleum

Ultra Deep Clean

Before

After
Ultra Deep Clean safely and efficiently lifts stains and contaminants from deep within grout, concrete, and other porous surfaces.

**STEP 1. APPLY ULTRA DEEP CLEAN**
Mix water with Ultra Deep Clean Concentrate (3:1 ratio) and use a string mop or low-pressure pump sprayer to thoroughly wet the floor.

**STEP 2. ALLOW TO DWELL FOR 5-10 MINUTES**
Give the solution time to aggressively attack and lift stains without fear of etching tiles or fixtures.

**STEP 3. SCRUB THE FLOOR**
Add water to the floor and scrub with a stiff-bristled brush (by hand or floor machine) or pressured floor spinner.

**STEP 4. VACUUM AND RINSE THE FLOOR**
Remove solution using a wet vacuum or pressured floor spinner. Rinse the floor multiple times and allow the floor to dry thoroughly.

**STEP 5. APPLY UDT GROUT COLORANT (OPTIONAL)**
Apply UDT Grout Colorant if a new shade or color is desired.

**STEP 6. APPLY EPIC**
Apply a thin coat of EPIC High-Performance Floor Finish (Tile & Grout edition) to create an impenetrable membrane that enhances, preserves, and protects tile and grout for years!
